Cloud vs. On Premise

It's up to you: Signavio as a secure cloud service or as a self-hosted solution!
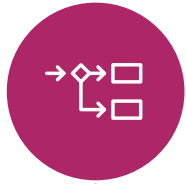

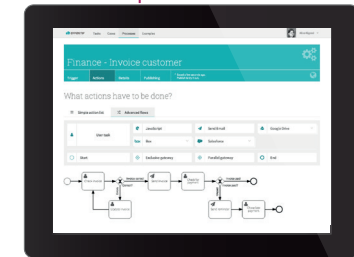

Signavio
Process Editor

Process modeling has never been so easy. The web-based Signavio Process Editor is an intuitive platform for modeling and analyzing your business processes. Thanks to QuickModel, which allows processes to be designed in a clear spreadsheet format, beginners can also be effort-lessly involved in modeling. With the Signavio Process Editor, the processes easily fall into alignment. Invite your colleagues to comment on processes and make them available for all your employees to view in the Collaboration Portal. Establish process management in your business now and increase both your company's efficiency and the satisfaction of your employees.

Signavio
Decision Manager

Complete Business Decision Management in the cloud! The Signavio Decision Manager offers you the unique oppor-tunity to manage your business decisions and processes in a single platform. The new Decision Model & Notation Stan-dard (DMN 1.0™) is fully supported by the Signavio Decision Manager and enables the simple creation of decision diagrams and tables. Business rules can also be easily incorporated into existing process models. The Signavio Decision Manager simultaneously increases the level of transparency and compliance in your company while reducing substantial risks.

Effektif

Have you already documented your processes? With Effektif you can go one step further and automate your processes in just a few minutes! Above all, this intuitive tool is aimed at professionals who desire a user friendly working environment for the automation of business processes. Users benefit from individual task lists, seam-less integration with other cloud systems, as well as the creation of forms. With Effektif, workflow manage-ment becomes relevant to all! Effektif is part of the Signavio product portfolio and is currently one of the most up to date workflow systems on the market.
