Feature Scope Description for SAP Signavio Process Manager

SAP Signavio Process Manager

SAP Signavio Process Manager is a cloud-based platform for modeling and analyzing business processes. The tool provides you with an ideal environment for working collaboratively on your processes.

Feature	Description
Process Modeling	Enables you to model and document business processes
Shared Repository for Process Models	Enables you to manage models in one place
Shared Dictionary	Reuse modeling elements across your organization by accessing and selecting them on the shared Dictionary
Custom Dictionary Categories	Create custom dictionary categories that match your specific business needs
QuickModel	Create BPMN® 2.0 process models quickly and easily with the QuickModel feature
Modeling Conventions	Perform modeling checks and customize process models
Multi-language Support	Model processes in multiple languages
File Management	Upload and manage files
Access Rights Management and Security Settings	Manage access rights for different users groups and personalize security settings
Customizable Modeling Convention	Verify process models and customize modeling conventions
Attribute Visualization	Visualize attributes with icons and colors
Customizable Process Documentation	Customize process documentation with templates
Process Cost Analysis	Analyze process models for costs and resources checks and improvements
Process Reports	Create, save and share reports in several different formats
BPMN Simulation	Simulate modeling processes step-by-step
Risk Management	Manage risks and controls in process landscape
Approval Workflow	Set and manage approval workflows for process models
Smart Folders	Use smart folders to save search results from search queries
Decision Modeling	Model business decisions in DMN
HTTP REST API	Access Signavio Business Transformation Suite APIs from applications outside Signavio
Signavio Connector for SAP Solution Manager 7.2	Connect to SAP Solution Manager 7.2

Important Disclaimers and Legal Information

Beta and Other Experimental Features

Experimental features are not part of the officially delivered scope that SAP guarantees for future releases. This means that experimental features may be changed by SAP at any time for any reason without notice. Experimental features are not for productive use. You may not demonstrate, test, examine, evaluate or otherwise use the experimental features in a live operating environment or with data that has not been sufficiently backed up.

The purpose of experimental features is to get feedback early on, allowing customers and partners to influence the future product accordingly. By providing your feedback (e.g. in the SAP Community), you accept that intellectual property rights of the contributions or derivative works shall remain the exclusive property of SAP.

Bias-Free Language

SAP supports a culture of diversity and inclusion. Whenever possible, we use unbiased language in our documentation to refer to people of all cultures, ethnicities, genders, and abilities.
