Innovation recommendations	<p data-bbox="512 640 820 663">Enables you to do the following:</p> <ul data-bbox="512 701 1388 943" style="list-style-type: none"> <li data-bbox="512 701 1388 869">• Display a list of innovation recommendations that your organization can use to plan long-term strategic improvement using SAP solutions and applications. You can choose from various categories of recommendations. You can also see what end-to-end processes or lines of business a recommendation is related to and filter recommendations by end-to-end processes or lines of business. <li data-bbox="512 882 1388 943">• Select a specific innovation recommendation to display more information from other information sources outside the solution.
Recommendations linked to process performance indicators	<ul data-bbox="512 972 1388 1391" style="list-style-type: none"> <li data-bbox="512 972 1388 1193">• Correction recommendations for process performance indicators enable you to do the following: <ul data-bbox="568 1048 1388 1193" style="list-style-type: none"> <li data-bbox="568 1048 1388 1108">• Display a list of correction recommendations relevant for a specific performance indicator. <li data-bbox="568 1122 1388 1193">• Select a specific correction recommendation to get more detailed information about how to act on the recommendation. <li data-bbox="512 1207 1388 1391">• Innovation recommendations for process performance indicators enable you to do the following: <ul data-bbox="568 1263 1388 1391" style="list-style-type: none"> <li data-bbox="568 1263 1388 1323">• Display the available innovation recommendations for a specific performance indicator. <li data-bbox="568 1337 1388 1391">• Select a specific innovation recommendation to get more detailed information about it from other information sources outside the solution.
Monetary values	<ul data-bbox="512 1420 1388 1839" style="list-style-type: none"> <li data-bbox="512 1420 1388 1559">• Monetary values for some process performance indicators: Enables authorized users to view the accumulated total value of documents or items in their preferred currency in the details displayed for a process performance indicator when this monetary information is available. <li data-bbox="512 1572 1388 1711">• Monetary values in process flows: Enables authorized users to toggle between the number of business object instances and their accumulated total value of documents or items in their preferred currency in the information shown in process flows when this monetary information is available. <li data-bbox="512 1724 1388 1839">• Monetary values in filters: Enables users to toggle between the number of business object instances and their accumulated total value of documents or items in their preferred currency in the filter values shown when this monetary information is available.

3 Application Configuration

The following features are provided in the administration area of SAP Signavio Process Insights.

Feature	Description
Industry selection	Enables you to specify your industry so you can get industry-specific innovation recommendations in addition to general cross-industry recommendations.
Data collection runs	Enables you to do the following: <ul style="list-style-type: none">• Specify how many data collection runs are to be stored for each performance indicator. *• Get an overview of the data collection runs that have been completed to transfer data from your ERP systems.• Configure which performance indicators are to be active or inactive for specific systems. *• Delete performance indicator data for one or all systems. *

* This applies only to the SAP Signavio Process Insights, base package.

4 Data Privacy Management

The following application features are provided with SAP Signavio Process Insights.

Feature	Description
Retrieval of records containing personal data	Enables authorized users to search for instances of personal data stored for a data subject.
Download of records containing personal data	Enables authorized users to download the records of personal data retrieved.
Deletion of fields containing personal data	Enables authorized users to delete fields containing personal data in the records retrieved.

5 Data Integration

The following data integration features are provided with SAP Signavio Process Insights.

Feature	Description
Data ingestion	Enables you to send data from existing SAP ERP systems that you manage to the solution's cloud tenant set up for your subscription.*

* If you have the stand-alone SAP Signavio Process Insights, base package, data is sent to your tenant periodically on an ongoing basis. If you have the SAP Signavio Process Insights, starter pack as part of the business process transformation starter pack for RISE with SAP or you are an SAP partner with a cloud test and demonstration license, data collection runs once only.

6 User Management and Authorization

The following user management features are supported by SAP Signavio Process Insights.

Feature	Description
User management	The solution enables you to handle user management in your tenant through the use of the standard features of SAP Business Technology Platform (SAP BTP).
Authorization	The solution supports role-based authorization management and allows you to assign roles to users through the use of the standard features of SAP BTP. The authorizations can be used to restrict access to information for end-to-end processes, lines of business, or data for monetary values, for example.

7 Product Availability

The following information is related to product availability aspects for SAP Signavio Process Insights.

Availability Aspect	Description
Environment	The solution is available in the SAP Business Technology Platform, Cloud Foundry environment.
Subscription plans	<p>There are 2 subscription plans available for the SAP Signavio Process Insights, base package: <code>standard</code> and <code>test</code></p> <p>The following additional subscription plans are available:</p> <ul style="list-style-type: none">• <code>rise</code>: This plan is available to customers accessing the solution using the SAP Signavio Process Insights, starter pack as part of the business process transformation starter pack for RISE with SAP.• <code>partner</code>: This plan is available to SAP partners with a cloud test and demonstration license for SAP Signavio Process Insights.

Important Disclaimers and Legal Information

Hyperlinks

Some links are classified by an icon and/or a mouseover text. These links provide additional information.

About the icons:

- Links with the icon : You are entering a Web site that is not hosted by SAP. By using such links, you agree (unless expressly stated otherwise in your agreements with SAP) to this:
 - The content of the linked-to site is not SAP documentation. You may not infer any product claims against SAP based on this information.

Videos Hosted on External Platforms

Some videos may point to third-party video hosting platforms. SAP cannot guarantee the future availability of videos stored on these platforms. Furthermore, any advertisements or other content hosted on these platforms (for example, suggested videos or by navigating to other videos hosted on the same site), are not within the control or responsibility of SAP.

Beta and Other Experimental Features

Experimental features are not part of the officially delivered scope that SAP guarantees for future releases. This means that experimental features may be changed by SAP at any time for any reason without notice. Experimental features are not for productive use. You may not demonstrate, test, examine, evaluate or otherwise use the experimental features in a live operating environment or with data that has not been sufficiently backed up.

The purpose of experimental features is to get feedback early on, allowing customers and partners to influence the future product accordingly. By providing your feedback (e.g. in the SAP Community), you accept that intellectual property rights of the contributions or derivative works shall remain the exclusive property of SAP.

Example Code

Any software coding and/or code snippets are examples. They are not for productive use. The example code is only intended to better explain and visualize the syntax and phrasing rules. SAP does not warrant the correctness and completeness of the example code. SAP shall not be liable for errors or damages caused by the use of example code unless damages have been caused by SAP's gross negligence or willful misconduct.

Bias-Free Language

SAP supports a culture of diversity and inclusion. Whenever possible, we use unbiased language in our documentation to refer to people of all cultures, ethnicities, genders, and abilities.
